Incubation Number 13 -- 2023-09-23 17:25

The figure is a scatter plot with a linear regression line and a confidence interval. The x-axis represents time of day, ranging from 23:30 to 05:00. The y-axis represents a variable, with tick marks but no numerical labels. The data points are black dots. A solid blue line represents the linear regression, and a grey shaded area around it represents the confidence interval. The data shows a general upward trend, with a notable cluster of points at the top right (around 04:30-05:00) and a cluster at the bottom (around 01:30-03:00).
