

The figure is a scatter plot with a linear regression line and a confidence interval. The x-axis represents time in 30-minute intervals from 18:00 to 00:00. The y-axis represents the number of tweets, with a scale from 0 to 100. The data points are black dots, and the regression line is a solid blue line. A gray shaded area around the blue line indicates the confidence interval. The data shows a general downward trend, with a notable horizontal cluster of points between 19:00 and 20:00 at a tweet count of approximately 40.
