The figure is a scatter plot with a fitted regression line and a confidence interval. The x-axis represents time in 30-minute intervals from 17:30 to 23:00. The y-axis represents the number of calls, ranging from 0 to 100. Black dots represent individual data points. A solid blue line shows the linear regression fit, which has a negative slope. A light gray shaded region around the blue line indicates the confidence interval. The data shows a general downward trend, with a significant cluster of high call counts (around 100) between 18:45 and 19:15.
