The figure is a scatter plot with a linear regression line and a confidence interval. The x-axis represents time of day, ranging from 05:00 to 11:00 in 30-minute increments. The y-axis is unlabeled but shows a range of values. The data points are black dots, and the regression line is a solid blue line. A grey shaded area around the blue line represents the confidence interval. The data shows a general downward trend, with a slight increase in scatter and lower values after 07:00.
